

6516208649.txt

Dear Gentleman,
Being a tractor/trailer driver I need to know the best routes to travel as I make deliveries throughout the North-East.

The Satellite Radio format provides me with minute to minute traffic and weather alerts in many of the metropolitan areas which I must travel through.

To limit Satellite Radio's ability to provide this service would be a great dis-service to the general public.

Sincerely,

Gregg Jarvis
